

IST256 Project Phase 3: The Rest

[1] Blackboard Group Number.

Enter your blackboard Group number: 28

[2] Group Members and their contributions to this deliverable

Enter the names of your group members and highlight their SPECIFIC and DETAILED contributions to the project for this phase. **Each member of the team should make significant code contributions. Team members who do not make code contributions or who do not contribute to the project effort will receive a lower grade.**

Name	Detailed Summary of contributions
Gabrielle Schoeffer	Created poster for project (created wording and summary of our project along with explanation of our code in a photoshop template), created youtube videos for our demo day pitch and our reflection
Kimberly	Was in charge of the coding with the graphs along with creating the github repository
Ibrahim	Implemented the stockx api and created a function to properly structured the data for easy integrated with matplotlib's graphs.

[3] Project Github Repository

Provide a **link** to your project's GitHub repository. In this repository should be 1) code examples from the previous deliverable, 2) a digital copy of your poster as a PDF or JPG, 3) your project code as you worked on the project (which is important as it helps your mentor see how to derived at the final deliverable), 4) Your final project code deliverable (clearly identified) and 5) any other artifacts relevant to your work which will help your faculty mentor grade your project. See project page for details.
